

VARNAM NATURALS

MASTER LEGAL TERMS, CONDITIONS & OPERATIONAL ARCHITECTURE

Governed under Indian Statutory Frameworks & Consumer Protection Mandates

Product Scope:	Edible Cold-Pressed Oils, Traditional Ghee, Organic Fruits & Vegetable Powders	Enforcement Date:	July 9, 2026
Applicable Acts:	FSS Act 2006, FSS (Labeling and Display) Regulations, & DPDP Act 2023	Official Mail ID:	varnam.mda@gmail.com

PREAMBLE: This master legal instrument establishes the definitive terms of service, logistic operational rules, information handling bounds, and consumer defense liability exemptions for the commercial entity trading under the registered brand identity **M/s Varnam Naturals** (hereinafter referred to as the 'Company'). By interacting with, accessing, or processing any transaction through the platform, the customer (hereinafter referred to as the 'Buyer') unreservedly consents to be legally bound by this regulatory framework.

SECTION I: SHIPPING, LOGISTICS & CONSIGNMENT PROTOCOL

STATUTORY RULE: RULE 4 & 6 OF THE CONSUMER PROTECTION (E-COMMERCE) RULES, 2020

The Company implements a specialized operational matrix tailored specifically around the thermal stability, multi-layered spillproofing, and absolute sanitation parameters required for raw natural lipids, dairy fats, and chemical-free agricultural powders during long-haul interstate courier routing.

- 1.1 Fulfillment Framework:** All confirmed orders shall be processed, quality-checked, and safely dispatched within a window of **1 to 3 business days** from receipt of payment. Order execution and physical handovers to courier networks are completely paused on Sundays and national public holidays.
- 1.2 Transit Commitments:** Standard domestic logistics within the territory of India are executed via tier-one partner carriers, averaging estimated transit periods between **3 to 7 business days**. Delayed transit times arising from force majeure events, environmental disturbances, or local tier zoning limitations are legally exempt from delivery liability timelines.
- 1.3 Tariff Calculations:** Courier and logistics tariffs are dynamically calculated during digital checkout based completely upon absolute dead weight or volumetric weight dimensions alongside destination pincode matrices.

Clause 1.4: Ambient Thermal Alterations Disclaimer

Buyers acknowledge that unrefined, all-natural food assets do not contain artificial stabilizers and therefore adapt physically to regional ambient temperatures across geographic distribution pathways:

A. UNREFINED & COLD-PRESSED VEGETABLE OILS:

Cold-pressed Coconut Oil possesses an organic melting point of approximately 24°C. It will naturally cloud, crystallize, or turn into a solid block during winter phases or across cooler regional territories. This represents an absolute testament to chemical-free purity and contains zero quality degradation.

B. PURE TRADITIONAL GHEE:

Crafted using ancient curd-churning techniques, our Ghee changes state seamlessly without loss of shelf life. It may fully liquefy or settle into an unpolished granulated semi-solid state depending on the seasonal thermal patterns of the courier carrier.

SECTION II: DIGITAL PRIVACY & DATA PROTECTION FRAMEWORK

STATUTORY RULE: DIGITAL PERSONAL DATA PROTECTION (DPDP) ACT, 2023

In accordance with national data privacy statutes, the Company collects and handles all private parameters under absolute data minimization metrics, guaranteeing strict user privacy defenses.

- **2.1 Authorized Data Ingestion:** Information collected at checkout is limited entirely to data necessary to execute financial settlement and delivery: Customer Legal Name, exact Shipping and Billing Addresses, active Mobile Contact Numbers, and digital Email ID (varnam.mda@gmail.com).
- **2.2 Protection Matrix:** Electronic transaction routes are completely enclosed within industry-standard encrypted PCI-DSS payment gateways. The Company enforces an ironclad covenant **never selling, trading, renting, or leasing** customer profiling parameters with third-party advertising companies.

SECTION III: TERMS, CONDITIONS & OWNER LIABILITY EXEMPTION CLAUSES

All items distributed by the Company are subject strictly to the following corporate protections:

3.1 Product Integrity & Statutory Labeling Disclaimers

- **3.1.1 Anti-Foaming Shield:** Our Cold-Pressed Groundnut, Sesame, and Coconut oils are unrefined and retain raw moisture fractions. Because they carry absolute zero synthetic anti-foaming chemical additives (such as Dimethyl Polysiloxane), they may naturally exhibit mild foaming behaviors when heated for culinary preparation. This is structural proof of clean extraction.
- **3.1.2 Mandatory FSSAI Edible Oil Labeling Declaration:** In compliance with the Food Safety and Standards (Labeling and Display) Regulations, the corporate packaging labels for all commercial iterations of Groundnut Oil, Sesame Oil, and Coconut Oil distributed by the Company shall explicitly, prominently, and unreservedly bear the statutory declarations: **"NOT TO BE SOLD LOOSE"** and **"FREE FROM ARGEMONE OIL"**.

- **3.1.3 Dates Powder Moisture Sensitivity:** Dehydrated naturally as a 100% pure organic fruit sweetener, our Dates Powder contains zero chemical anti-caking or anti-clumping additives. Due to the rich presence of natural fructose, contact with ambient humidity may cause natural clumping. Gentle agitation restores original powder traits without any structural spoilage.
- **3.1.4 Allergen & Sensitivity Waiver:** The Buyer assumes full liability to inspect digital and physical ingredient panels before consumption. Varnam Naturals stands completely absolved of legal or financial liability regarding individual food allergies, dietary hypersensitivity, or adverse bodily reactions.

3.2 Intellectual Property Guardrails

The enterprise nomenclature "Varnam Naturals", registered commercial logos, artistic brand layouts, packaging graphics, proprietary formulation metrics, underlying web code architectures, and digital content remain the exclusive intellectual properties of the brand owners. Any unauthorized replication or commercial exploitation will face immediate legal action under the Indian Copyright Act, 1957 and Trade Marks Act, 1999.

**SECTION IV: SOVEREIGN RETURN, REPLACEMENT & REFUND
PROTOCOL**

**STATUTORY SANITARY MANDATE & HYGIENE RESTRICTION:
PURSUANT TO THE FOOD SAFETY AND STANDARDS ACT OF INDIA (FSSAI), ALL
EDIBLE VEGETABLE OILS, DAIRY FATS, AND SWEETENING POWDERS ARE
CATEGORIZED AS INGESTIBLE, PERISHABLE SANITARY CONSUMABLES.
CONSEQUENTLY, THE COMPANY ENFORCES A STRICT NO-RETURN AND NO-
EXCHANGE POLICY ONCE A CONSIGNMENT HAS BEEN SUCCESSFULLY DELIVERED
AND UNSEALED.**

4.1 Verified Channels for Redressal Claims

The Company's internal quality cell will authorize product replacements or financial refunds exclusively for the following two warehouse and transit failures:

1. The physical container suffered verifiable structural breakdown, leakage, or broken seals prior to or during transit.
2. An incorrect variant or wrong item type was processed and dispatched by our warehouse.

4.2 The Mandatory Unboxing Video Protocol

To eliminate fraudulent loss assertions and verify structural issues, **all claims must be backed by an unedited, clear, continuous, single-shot unboxing video recording.**

The camera must begin recording the package in its completely sealed courier flyer (with the airway bill text clearly legible) and trace the unboxing uninterrupted down to the moment the internal product defect is discovered.

All claims must be submitted via email to formal support at **varnam.mda@gmail.com** within exactly **48 hours** of courier-stamped delivery. Missing video evidence invalidates the processing pipeline.

4.3 Settlement Window

Upon verification and authorization by the internal quality control cell, financial returns are routed directly back into the buyer's original transactional source account within **5 to 7 working business days**.
